

Community Treatment and Care Services

Important notice for patients at Aberdeen City GP Practices

New Community Treatment and Care (CTAC) Clinics in Aberdeen City will be opening from June 2022. This nurse-led service will provide a specialist range of services, some of which you may currently be more familiar with receiving at your GP Practice.

Services will include:

- **Blood Pressure** - Checking your blood pressure, if this has been requested by your GP Practice.
- **Blood Tests** - Taking blood samples that have been requested by your GP Practice.
- **Ear Care** - Specific criteria to be met, Clinics will advise.
- **Removal of sutures/staples** - After surgery or injuries.
- **Wound Care** - Assessing and dressing wounds in partnership with your GP surgery.

Why is this service changing?

Changes to the arrangements between GP Practices and the Scottish Government have meant that some services will be provided by NHS staff from either your GP Practice, or a CTAC Clinic. These services will be delivered directly by Aberdeen City Health and Social Care Partnership, working alongside your GP Practice.

What this means for me?

Patients will benefit from having access to expertly trained nursing staff at the CTAC Clinics for assessment and treatment, in addition to your GP Practice. This will offer you more options of locations to attend for your healthcare needs, across the City.

Your GP Practice will be kept up to date on your management, and involved in your care, should it be necessary.

It's a new way of receiving care – one which helps us ensure people are able to see the right person at the right place at the right time, and one which we are sure the community will come to value.
